# When purchasing the set-up and floor, if applicable

## When purchasing a build up

You will be contacted by our installer min. 3 weeks before installation.  
Here you can see what needs to be prepared before installation.  
Caravan placement and floor layout (See Isabella's help drawing)

## When purchasing a build up and flooring

You will be contacted by our installer min. 3 weeks before installation.  
Here you can see what needs to be prepared before installation.  
Details for caravan placement  
Number of tiles 30/30 for floor leveling.

Tiles for floor not included. Number to be agreed with the installer.

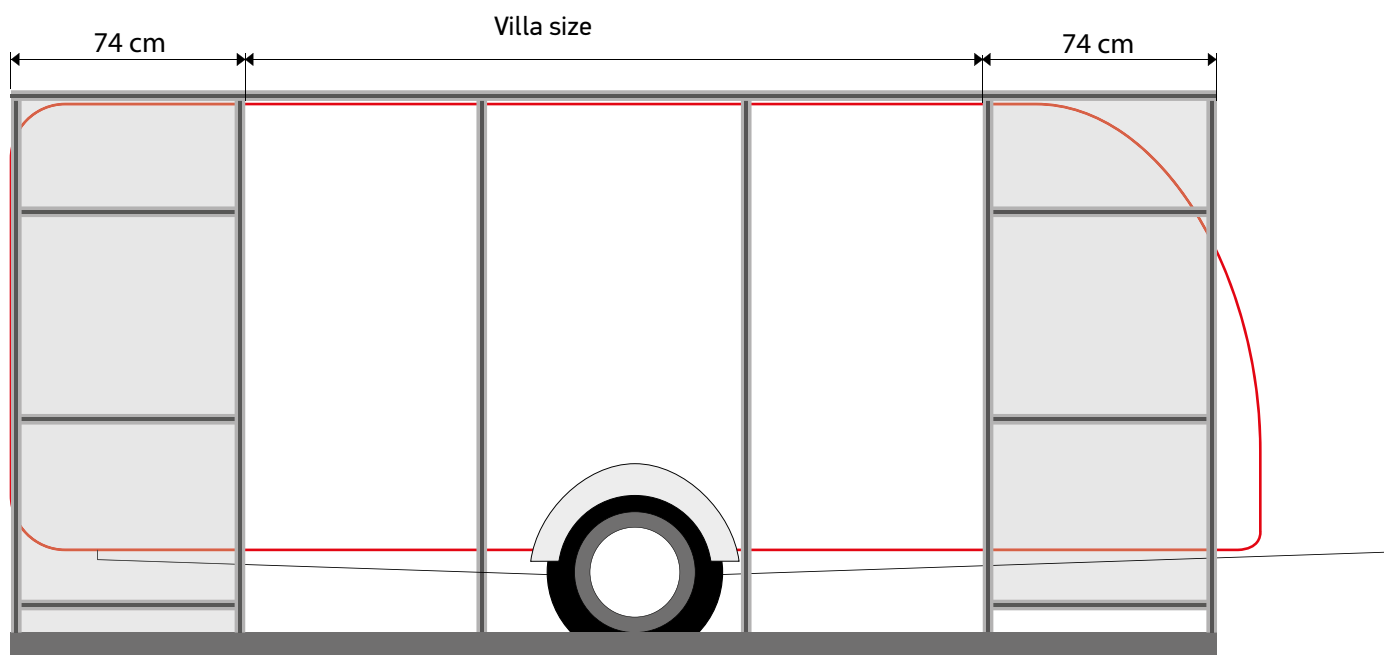

Tiles : The number of tiles is indicative, based on level terrain.

### Villa size:

550 - 402cm  
650 - 502cm  
750 - 602cm  
850 - 702cm  
950 - 802cm

	Villa 300	Villa 370
550	30	42
650	36	48
750	41	54
850	45	60
950	50	66

On uneven terrain, more tiles may be required. The installer will assist with this when contacted prior to installation.

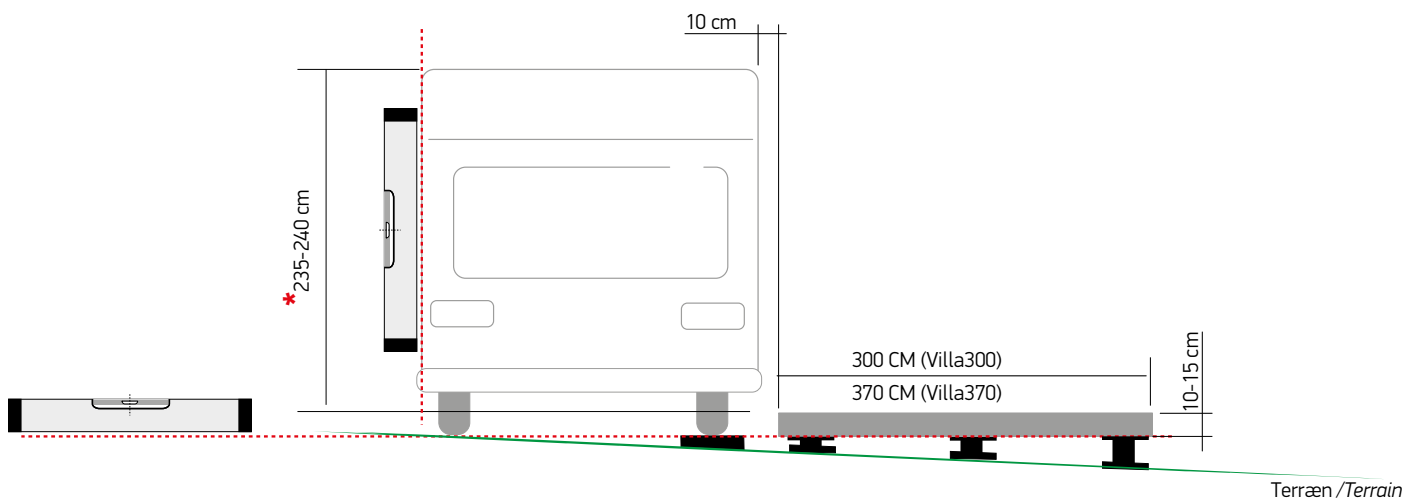

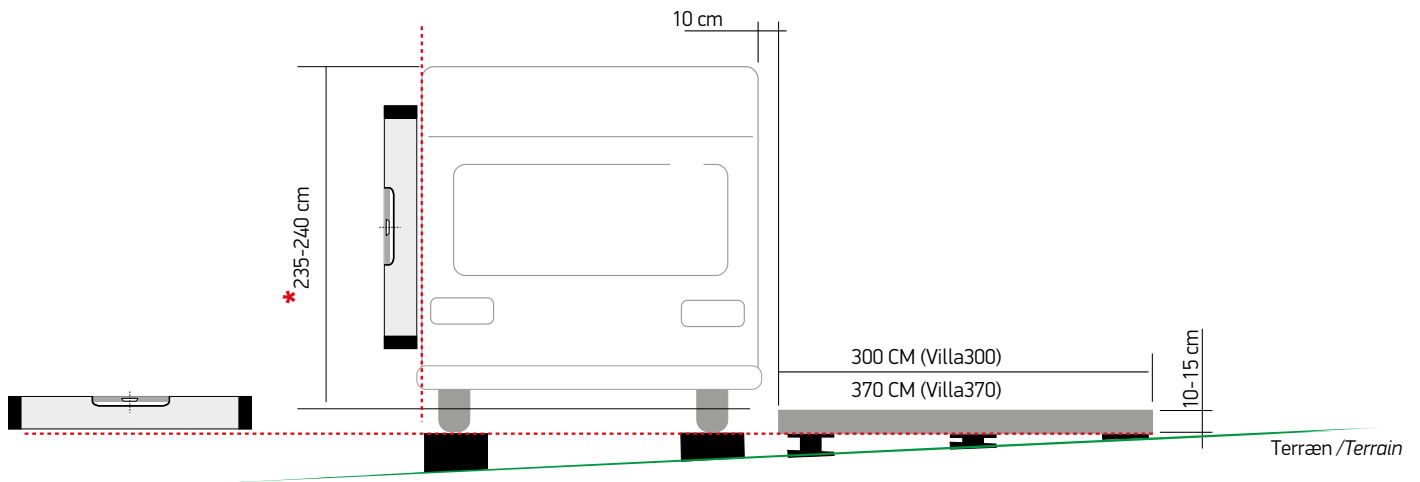

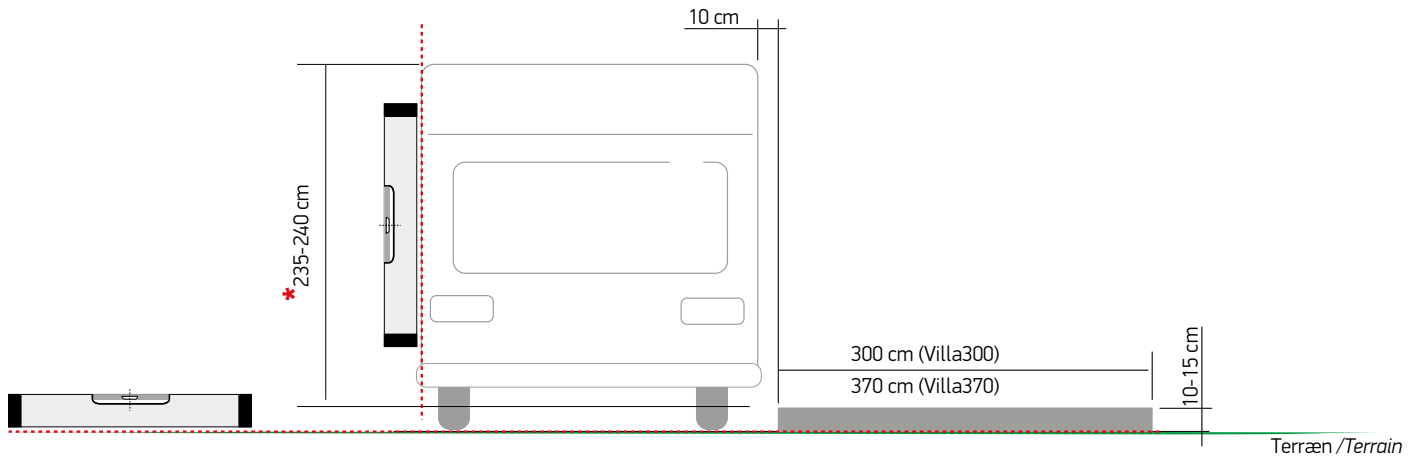

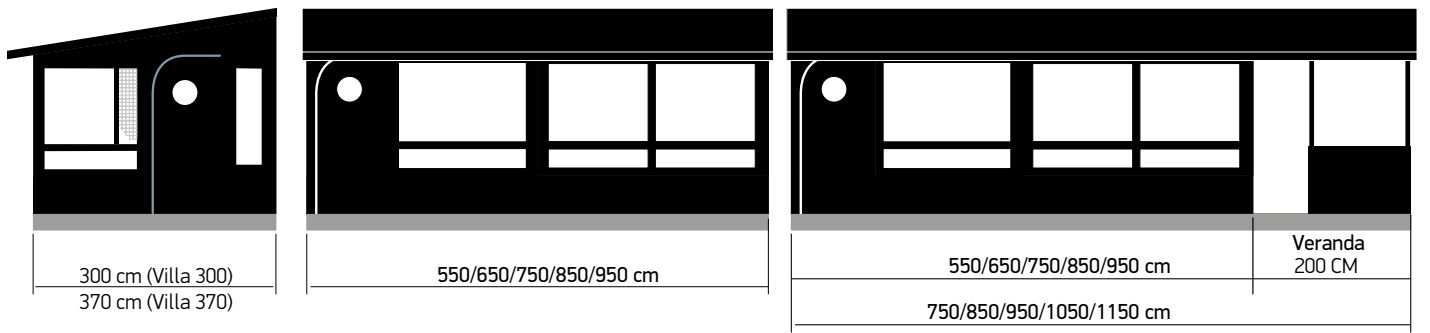

- \* If the customer is laying flooring, we need 235 - 240 cm from top floor to rail.
- \*\* If the Isabella is laying flooring, there must be 255 - 260 cm from ground to rail  
( the highest point on the site )
- \*\*\* If the customer has not prepared for the installer in advance, we reserve the right to send the installer away.  
A new appointment will then need to be arranged at an additional cost.

# Målskema for placering af gulv

Measurement chart for floor placement

Villa standard

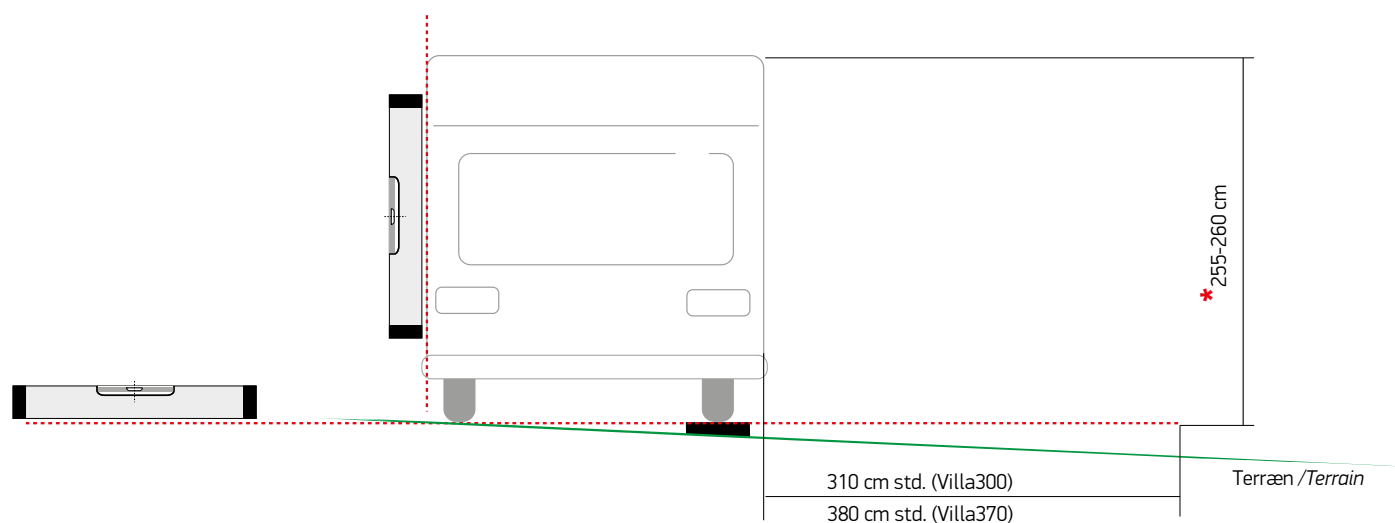

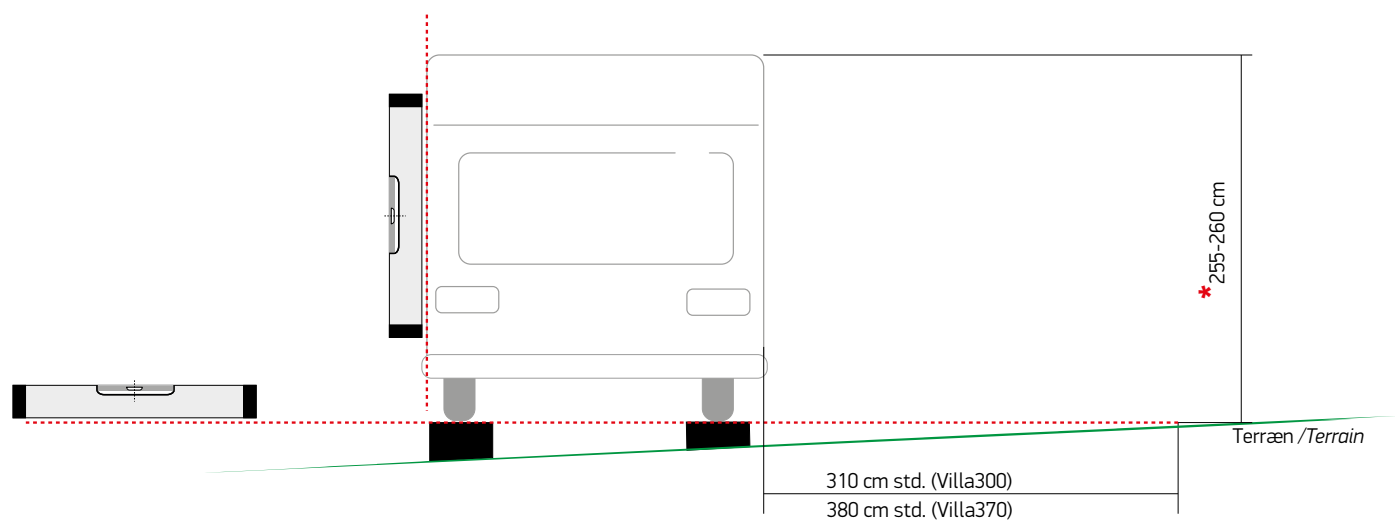

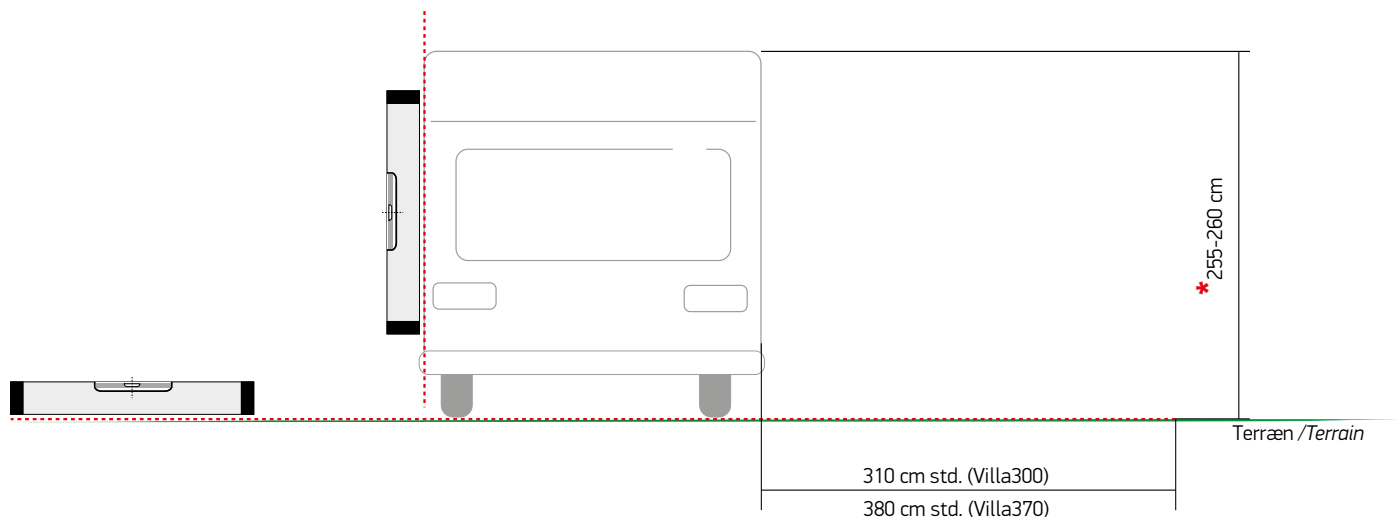

**\*OBS!**

Højden er fra overkant af gulv til vognskinne / Height is from top of floor to carriage rail

# Målskema for placering af gulv

Measurement chart for caravan placement

Villa standard

**\*OBS!**

Højden er fra jorden ved telt fronten til vognskinne / Height is from the ground at the tent front to the trolley rail
